Screws

IMPORTANT

**No power tools - Use hand tools only
Do not overtighten screws**

DINING TABLE INSTALLATION

1. We recommend placing the table top and table legs upside down to make it easier to insert the bolts
2. Install the legs so that the bolts go in through the intended holes. After this is done, please secure the bolts
3. After all legs are secured, please carefully turn the table to the right position

4. The table is now ready for use

IMPORTANT

**No power tools - Use hand tools only
Do not overtighten screws**
